Continuation of 5. does NOT place the application in condition for allowance because: The Applicant's arguments are not persuasive. Yogaratnam's specification including the drawings have clearly taught opening multiple JAVA applications and executing them in separate windows, wherein in addition, Yogaratnam's claims specifically disclose and refer to the JAVA components of the application as multiple JAVA applets, which clearly are disclosed in the claims of Yogaratnam and hence has been previously disclosed. Even with a distinction made between JAVA applications and applets, Yogaratnam has disclosed wherein both the applications and applets are referred to when multiple applets are executed and displayed in the separate windows. Yogaratnam does have a JAVA virtual machine that is responsible for handling the back end processes involving running and executing multiple JAVA applets, but Yogaratnam does go further in disclosing a step by step process of each applet being launched and executed with the final step including displaying the applet to the user interface, wherein multiple applets would follow these steps and end with the displays of multiple applets in separate windows

as disclosed in the drawings and specification of Yogaratnam (column 5, lines 60-63).
